<b>Note 1</b>	<p>In the absence of a pre-existing Contractual Agreement, a Gaining CP (GCP) will need to sign a bilateral NDA with the Losing CP (LCP) which this CP (or their agent) will provide on request.</p> <p><b>PoV Registration:</b> CPs need to be registered (with OTA2) to use the PoV process. By doing this, CPs are ‘signing-up’ to the principle that they can contact the other ‘registered’ party directly and be confident that full co-operation will be given, and, in-turn as an LCP, will co-operate with a registered GCP who contacts them.</p> <p>OTA2 encourages all CPs to register their PoV contact details. The PoV contacts register is maintained by OTA2 and is published on the 2 web-sites below:</p> <p><a href="http://www.offta.org.uk/best.htm">http://www.offta.org.uk/best.htm</a></p> <p><a href="http://www2.magrathea-telecom.co.uk/industry_porting/">http://www2.magrathea-telecom.co.uk/industry_porting/</a></p> <p>If the LCP is known to the GCP, and both are PoV registered, then the GCP may submit a PoV request direct to the LCP, or the GCP may choose to submit their PoV request to the LCP’s Network Partner (i.e. the Voice Service Provider) in the 1st instance.</p> <p>N.B....For Data Protection reasons, some LCPs will only process PoV requests from GCPs who already have a contractual agreement (with the appropriate confidentiality warranties) in place with them.</p> <p>Where such a Porting agreement does not already exist, the GCP has 2 options:-</p> <p><b>1st Option</b> – Bilateral Non-Disclosure Agreement (NDA) – Recommended: The GCP should ask the LCP to provide an NDA which the GCP will review, sign and return. Once both parties have signed this bilateral NDA, the PoV transaction (and all subsequent PoV requests between the 2 parties) can proceed.</p> <p><b>2nd (Default) Option</b> - Where a GCP is unable to enter into a bilateral NDA with the LCP, the GCP may alternatively submit their PoV request via their own Network partner who will send the request directly to the LCP or their Network partner (on behalf of the GCP) – The assumption is that the Gaining Network</p>
